

TURTLE ROCK SPEEDING

This topic has been an ongoing point of issue for several years. Estimate of expenditures for this have been rumored to be nearly \$60,000 to date and yet not a SINGLE citation/fine has been levied. Apparently this “system” purchased is very cumbersome to gather data and implement violations. IF there is a speeding issue why hasn’t anything been done to resolve it?

This is yet another example of the lack of leadership for the Board. Again, IF there is a documented speeding issue there needs to be measures put in place to address the issue. Not everyone is going to agree on one specific solution, the Board must take the “bull by the horns” and make a decision. The acknowledgment of this safety issue and lack of action exposes the community to liability.
